Claim Objections

1. Claim 1 is objected to because of the following informalities: “non operating” should be --non-operating-- and “formerly temporarily exclusively” should be --formerly, temporarily, exclusively--. See claim 1, lines 13-15. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al. (5,568,857), hereinafter Chen. Regarding claim 1, Chen teaches an efficient factory production line transition storable transfer conveyor system for selectively moving bundles from an upstream conveyor. Chen also teaches that the conveyor system includes an upstream conveyor end and a downstream conveyor end 10. Chen also teaches a storable transfer conveyor 20 in a first operation position temporarily exclusively occupying a floor area and the air space there above and located adjacent to the upstream conveyor. Chen also teaches that the transfer conveyor 20 in a first position impedes access by an operator between the upstream and down stream ends of the upstream conveyor and positioned to selectively deliver workpieces to the downstream conveyor 10 when the downstream conveyor is in operating position. It should be noted that the conveyor system is capable of transferring boundless. It should be noted that the transfer conveyor 20 is capable of moving to a second position whether the downstream conveyor 10 is in an operating mode

Art Unit: 3724

or in a non-operating mode. Chen also teaches that the storable conveyor 20 being selectively moveable to a second stored position in elevational juxtaposition with the downstream conveyor 10 when the downstream conveyor is in the non-operating mode, substantially vacating the floor area and the air space there above formerly, temporarily, exclusively occupied by the storable transfer conveyor 20. Chen also teaches that the elevational lifting of the transfer conveyor permits free unimpeded access and travel by the operator through the floor area when the trouble transfer conveyor is in the second stored inoperative position. See Figs. 1-8 and col. 2, lines 21-55 in Chen.

Allowable Subject Matter

4. Claims 2, 7-9, and 11-12 are objected to as being dependent upon a rejected base claim but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to teach that the storable transfer conveyor I places over on top of the downstream conveyor and the downstream conveyor has powered pulling means for pulling the storable conveyor onto a substantial portion of the downstream conveyor as set forth in claim 2.

Response to Arguments

5. Applicant's arguments with respect to claims 1- 2, 7-9, and 11-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
